REPORT NO. FT 110

EXPLANATION OF SAMPLING PROCEDURE FOR IMPORT SHIPMENTS INDIVIDUALLY VALUED UNDER $100

As described in the September 1953 issue of *Foreign Trade Statistics Notes*, formal immediate consumption items valued at less than $100[1] which have in the past been included in the statistics on a full-coverage basis are being included on an estimated basis effective with July 1953 statistics. The estimates are made from a 10 percent probability sample of the under $100 items. Under the new procedure, two new Schedule A classifications have been established for reporting these shipments in the statistics as follows:

9999 100 - Formal immediate consumption items valued at less than $100, free of duty.

9999 200 - Formal immediate consumption items valued at less than $100, dutiable.

Country information is shown under these numbers in this report for countries having significant trade in these new "catch-all" classifications. (The estimated total of the under $100 shipments is included in the total for each country in reports in country arrangement such as Report FT 120, *United States Imports of Merchandise for Consumption, Country of Origin by Subgroup.)* All of the estimated figures shown under Schedule A Numbers 9999 100 and 9999 200 are subject to a sampling error of no more than about 10 percent two-thirds of the time in the long run. This sampling error is actually less than 10 percent for most figures shown.

Any user interested in knowing the estimated amount of trade shown in 9999 100 and 9999 200 for a particular Schedule A commodity or commodities may request this information from the Bureau of the Census. It is expected that such requests will be for information on commodities which are, to the knowledge of the person requesting the information, imported to a significant degree in shipments of less than $100. The tables shown in the September 1953 *Foreign Trade Statistics Notes* on the extent of under $100 trade in individual commodities in April 1953 provide some guidance in this regard but as indicated in the *Notes* there may of course be a few additional commodities imported substantially in shipments of less than $100 in July or later months.

---

[1] The sample is selected from only the immediate consumption items, which constitute the bulk of the formal entry items valued at less than $100. Warehouse entry and warehouse withdrawal items valued at less than $100 are fully compiled, since sampling these items would result in very little savings and might result in significantly less accurate figures on changes in the amounts of particular commodities in warehouse.

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned hy the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, hut imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to he United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), hut there are some exclusions of items of relatively small importance in terms of total value such as merchandise valued at $100 or less which is entered informally.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into honded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from honded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have heen proccessed in honded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into honded storage warehouse, honded manufacturing warehouse, and honded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are puhlished monthly. General import commodity statistics are not puhlished hut are availahle for reference purposes. Information on merchandise withdrawn from honded storage warehouses for exportation (not included in either imports for consumption or general imports) is also availahle for reference purposes.

Trade hetween the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States hy vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 981. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives hy vessel. Summary vessel transportation statistics for hoth imports and exports are presented in Report No. FT 972. A more complete description of the coverage and presentation of these separate shipping statistics will he found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the formal import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given helow.

VALUATION

The values are in general hased on market or selling price and are in general f.o.h. the exporting country. (Transportation costs to the United States may inadvertently he included in the case of merchandise which is not suhject to an import duty hased on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications estahlished in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numhered classifications in that Schedule. The Tahle of Contents on page 3 of this report indicates the range of Schedule A commodity numbers covering related suhgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should he made to Schedule A. The commodity descriptions in this report are necessarily ahhreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily ohtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported hy the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped hefore it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are ahhreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is puhlished as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also availahle free upon request to the Bureau of the Census.

To save printing costs complete commodity hy country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number[1] separate country of origin information is shown only for countries from which imports during the period covered hy the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a comhined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can he supplied upon request. A charge may he made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data puhlished in this report for earlier months of the current and previous year are shown at the hack of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be puhlished in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular suhscrihers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly puhlication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered hy current statistics, unusual shipments, prohlems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are availahle for reference purposes prior to the puhlication of the report or may be ohtained in advance of puhlication on payment of the cost for a special report. Reports on a cost hasis can also he arranged for to ohtain additional detail compiled hut not puhlished. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tahulations or the availahility of special reports, request should be made to the Bureau of the Census.

REPORT NO. FT 110

EXPLANATION OF SAMPLING PROCEDURE FOR IMPORT SHIPMENTS INDIVIDUALLY VALUED UNDER $100

As described in the September 1953 issue of *Foreign Trade Statistics Notes*, formal immediate consumption items valued at less than $100[1] which have in the past been included in the statistics on a full-coverage basis are being included on an estimated basis effective with July 1953 statistics. The estimates are made from a 10 percent probability sample of the under $100 items. Under the new procedure, two new Schedule A classifications have been established for reporting these shipments in the statistics as follows:

9999 100 - Formal immediate consumption items valued at less than $100, free of duty.

9999 200 - Formal immediate consumption items valued at less than $100, dutiable.

Country information is shown under these numbers in this report for countries having significant trade in these new "catch-all" classifications. (The estimated total of the under $100 shipments is included in the total for each country in reports in country arrangement such as Report FT 120, *United States Imports of Merchandise for Consumption, Country of Origin by Subgroup.)* All of the estimated figures shown under Schedule A Numbers 9999 100 and 9999 200 are subject to a sampling error of no more than about 10 percent two-thirds of the time in the long run. This sampling error is actually less than 10 percent for most figures shown.

Any user interested in knowing the estimated amount of trade shown in 9999 100 and 9999 200 for a particular Schedule A commodity or commodities may request this information from the Bureau of the Census. It is expected that such requests will be for information on commodities which are, to the knowledge of the person requesting the information, imported to a significant degree in shipments of less than $100. The tables shown in the September 1953 *Foreign Trade Statistics Notes* on the extent of under $100 trade in individual commodities in April 1953 provide some guidance in this regard but as indicated in the *Notes* there may of course be a few additional commodities imported substantially in shipments of less than $100 in July or later months.

---

[1] The sample is selected from only the immediate consumption items, which constitute the bulk of the formal entry items valued at less than $100. Warehouse entry and warehouse withdrawal items valued at less than $100 are fully compiled, since sampling these items would result in very little savings and might result in significantly less accurate figures on changes in the amounts of particular commodities in warehouse.

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as merchandise valued at $100 or less which is entered informally.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 981. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 972. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the formal import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 3 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number[1] separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

UNITS OF QUANTITY

The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)

REPORT NO. FT 110

EXPLANATION OF SAMPLING PROCEDURE FOR IMPORT SHIPMENTS INDIVIDUALLY VALUED UNDER $100

As described in the September 1953 issue of *Foreign Trade Statistics Notes*, formal immediate consumption items valued at less than $100[1] which have in the past been included in the statistics on a full-coverage basis are being included on an estimated basis effective with July 1953 statistics. The estimates are made from a 10 percent probability sample of the under $100 items. Under the new procedure, two new Schedule A classifications have been established for reporting these shipments in the statistics as follows:

9999 100 - Formal immediate consumption items valued at less than $100, free of duty.

9999 200 - Formal immediate consumption items valued at less than $100, dutiable.

Country information is shown under these numbers in this report for countries having significant trade in these new "catch-all" classifications. (The estimated total of the under $100 shipments is included in the total for each country in reports in country arrangement such as Report FT 120, *United States Imports of Merchandise for Consumption, Country of Origin by Subgroup.)* All of the estimated figures shown under Schedule A Numbers 9999 100 and 9999 200 are subject to a sampling error of no more than about 10 percent two-thirds of the time in the long run. This sampling error is actually less than 10 percent for most figures shown.

Any user interested in knowing the estimated amount of trade shown in 9999 100 and 9999 200 for a particular Schedule A commodity or commodities may request this information from the Bureau of the Census. It is expected that such requests will be for information on commodities which are, to the knowledge of the person requesting the information, imported to a significant degree in shipments of less than $100. The tables shown in the September 1953 *Foreign Trade Statistics Notes* on the extent of under $100 trade in individual commodities in April 1953 provide some guidance in this regard but as indicated in the *Notes* there may of course be a few additional commodities imported substantially in shipments of less than $100 in July or later months.

---

[1] The sample is selected from only the immediate consumption items, which constitute the bulk of the formal entry items valued at less than $100. Warehouse entry and warehouse withdrawal items valued at less than $100 are fully compiled, since sampling these items would result in very little savings and might result in significantly less accurate figures on changes in the amounts of particular commodities in warehouse.

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as merchandise valued at $100 or less which is entered informally.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 981. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 972. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the formal import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 3 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number[1] separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

NEW EDITION OF SCHEDULE A TO BE AVAILABLE SOON

Schedule A is being reprinted effective January 1, 1954. This new edition supersedes the August 1, 1950 edition, corrected to May 1, 1952, and includes all changes made by supplementary bulletins since May 1, 1952. This reprint also provides for many combinations of classifications and some new classifications, resulting in a net decrease of approximately 600 in the number of import commodity classifications. Changes in presentation of the 1954 edition are as follows:

(1) The new Schedule is being printed in two parts. The first part includes information similar to that shown in the present edition, except that duty information is shown only for rates specified in the 1930 Tariff Act and trade agreement rates which are currently in effect. Trade agreement rates of duty which have been in effect since the 1930 Tariff Act, but are no longer in effect, will not be shown in the Schedule but will be included in a separate supplement to the new Schedule A. The two publications will be issued separately. The regular Schedule A will be available on January 1, 1954, and the supplement, which will be of interest primarily to individuals desiring to study the history of changes in tariff duties since 1930, will be available early in the Spring of 1954. The majority of users of the Schedule who are interested in preparing the import documents and those interested in using the current import statistics will be primarily interested in the regular Schedule A.

(2) The regular Schedule A is being printed in loose-leaf form and the pages are being printed on one side only. This will permit users of the Schedule to put special notes regarding individual classifications relating to the commodities they are interested in on the blank side. In addition, it will permit the reprinting of fewer pages in the future, since it will be necessary to reprint only those pages on which changes have been made. In the past it has been necessary to reprint both the front and back of the page even though changes may have been made only on one side.

Subscriptions may be placed with the Superintendent of Documents, Government Printing Office, Washington 25, D. C., with U. S. Department of Commerce Field Offices located in a number of principal cities, or with Collectors of Customs. The price of the Schedule is $3.50 per copy to domestic subscribers and $4.50 to foreign subscribers. As in the past, subscribers will receive as part of their subscription all supplemental bulletins and insert pages for at least one year.

The price of the supplement has not been announced as yet. Subscribers to the regular Schedule A will receive a separate notice regarding the subscription to the supplement within the next few months.

An order blank for the 1954 Schedule A is printed on the reverse side.

REPORT NO. FT 110

EXPLANATION OF SAMPLING PROCEDURE FOR IMPORT SHIPMENTS INDIVIDUALLY VALUED UNDER $100

As described in the September 1953 issue of *Foreign Trade Statistics Notes*, formal immediate consumption items valued at less than $100[1] which have in the past been included in the statistics on a full-coverage basis are being included on an estimated basis effective with July 1953 statistics. The estimates are made from a 10 percent probability sample of the under $100 items. Under the new procedure, two new Schedule A classifications have been established for reporting these shipments in the statistics as follows:

9999 100 - Formal immediate consumption items valued at less than $100, free of duty.

9999 200 - Formal immediate consumption items valued at less than $100, dutiable.

Country information is shown under these numbers in this report for countries having significant trade in these new "catch-all" classifications. (The estimated total of the under $100 shipments is included in the total for each country in reports in country arrangement such as Report FT 120, *United States Imports of Merchandise for Consumption, Country of Origin by Subgroup.)* All of the estimated figures shown under Schedule A Numbers 9999 100 and 9999 200 are subject to a sampling error of no more than about 10 percent two-thirds of the time in the long run. This sampling error is actually less than 10 percent for most figures shown.

Any user interested in knowing the estimated amount of trade shown in 9999 100 and 9999 200 for a particular Schedule A commodity or commodities may request this information from the Bureau of the Census. It is expected that such requests will be for information on commodities which are, to the knowledge of the person requesting the information, imported to a significant degree in shipments of less than $100. The tables shown in the September 1953 *Foreign Trade Statistics Notes* on the extent of under $100 trade in individual commodities in April 1953 provide some guidance in this regard but as indicated in the *Notes* there may of course be a few additional commodities imported substantially in shipments of less than $100 in July or later months.

---

[1] The sample is selected from only the immediate consumption items, which constitute the bulk of the formal entry items valued at less than $100. Warehouse entry and warehouse withdrawal items valued at less than $100 are fully compiled, since sampling these items would result in very little savings and might result in significantly less accurate figures on changes in the amounts of particular commodities in warehouse.

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as merchandise valued at $100 or less which is entered informally.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warebouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have heen proccessed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and honded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are puhlished monthly. General import commodity statistics are not puhlished but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and ita territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States hy vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 981. In addition, transportation statiatics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 972. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the formal import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with tbe definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costa to the United States may inadvertently he included in the case of merchandise which ia not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to tbe classifications established in Scbedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Tahle of Contents on page 3 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commoditiea and will aaaiat in locating in the report tbe atatistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abhreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly tbe commodity for which statistics are sbown. The omission of a Schedule A commodity classification from this report indicates no imports of tbat commodity.

COUNTRY OF ORIGIN

The country of origin is defined as tbe country where the merchandise was grown, mined or manufactured. In the event tbe importer can not readily obtain information as to tbe country of origin for a shipment, it is credited, for statistical purposes, to the country of sbipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported hy tbe importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are sbown in full in Schedule C, togetber with descriptiona of the countries, adjacent provinces, territories, islands, or other areas considered a part of tbe country for statistical purposes. Schedule C is puhlished as a part of Scbedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to tbe Bureau of the Census.

To save printing costs complete commodity by country of origin information is not sbown in the monthly issues of tbis report. For eacb Scbedule A commodity number[1] separate country of origin information is shqwn only for countries from which imports during the period covered by tbe report were $10,000 or more. Imports of that commodity originating in countries from wbicb the amount shipped was less tban $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (otber countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which tbe amount shipped was less tban $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in tbis report according to continents, in sequence within each continent from nortb to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data publisbed in tbis report for earlier months of the current and previous year are shown at the back of tbe current montb's report. With the exception of very important changes, any revisiona to data for earlier years are held for reflection in the figures to be publisbed in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in tbe Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly puhlication containing information of value to users of foreign trade statistics (such as, cbanges in type of shipments covered hy current statiatics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposea prior to the puhlication of the report or may be ohtained in advance of puhlication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to ohtain additional detail compiled hut not published. For free copies of tbe "Explanation of Statistics" or tbe catalog or for further information regarding reference copies of tabulations or the availability of special reports, request sbould be made to the Bureau of the Census.

REPORT NO. FT 110

EXPLANATION OF SAMPLING PROCEDURE FOR IMPORT SHIPMENTS INDIVIDUALLY VALUED UNDER $100

As described in the September 1953 issue of *Foreign Trade Statistics Notes*, formal immediate consumption items valued at less than $100[1] which have in the past been included in the statistics on a full-coverage basis are being included on an estimated basis effective with July 1953 statistics. The estimates are made from a 10 percent probability sample of the under $100 items. Under the new procedure, two new Schedule A classifications have been established for reporting these shipments in the statistics as follows:

9999 100 - Formal immediate consumption items valued at less than $100, free of duty.

9999 200 - Formal immediate consumption items valued at less than $100, dutiable.

Country information is shown under these numbers in this report for countries having significant trade in these new "catch-all" classifications. (The estimated total of the under $100 shipments is included in the total for each country in reports in country arrangement such as Report FT 120, *United States Imports of Merchandise for Consumption, Country of Origin by Subgroup.)* All of the estimated figures shown under Schedule A Numbers 9999 100 and 9999 200 are subject to a sampling error of no more than about 10 percent two-thirds of the time in the long run. This sampling error is actually less than 10 percent for most figures shown.

Any user interested in knowing the estimated amount of trade shown in 9999 100 and 9999 200 for a particular Schedule A commodity or commodities may request this information from the Bureau of the Census. It is expected that such requests will be for information on commodities which are, to the knowledge of the person requesting the information, imported to a significant degree in shipments of less than $100. The tables shown in the September 1953 *Foreign Trade Statistics Notes* on the extent of under $100 trade in individual commodities in April 1953 provide some guidance in this regard but as indicated in the *Notes* there may of course be a few additional commodities imported substantially in shipments of less than $100 in July or later months.

---

[1] The sample is selected from only the immediate consumption items, which constitute the bulk of the formal entry items valued at less than $100. Warehouse entry and warehouse withdrawal items valued at less than $100 are fully compiled, since sampling these items would result in very little savings and might result in significantly less accurate figures on changes in the amounts of particular commodities in warehouse.

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as merchandise valued at $100 or less which is entered informally.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warebouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been proccessed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 981. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 972. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the formal import entry (various Customs forms), whicb importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 3 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity.

COUNTRY OF ORIGIN

The country of origin is defined as the country where tbe merchandise was grown, mined or manufactured. In the event tbe importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of sbipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in tbis report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number[1] separate country of origin information is shown only for countries from which imports during the period covered by tbe report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total witbout country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from tbat country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at tbe back of the current montb's report. Witb the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to tbe publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

REPORT NO. FT 110

EXPLANATION OF SAMPLING PROCEDURE FOR IMPORT SHIPMENTS INDIVIDUALLY VALUED UNDER $100

As described in the September 1953 issue of *Foreign Trade Statistics Notes*, formal immediate consumption items valued at less than $100[1] which have in the past been included in the statistics on a full-coverage basis are being included on an estimated basis effective with July 1953 statistics. The estimates are made from a 10 percent probability sample of the under $100 items. Under the new procedure, two new Schedule A classifications have been established for reporting these shipments in the statistics as follows:

9999 100 - Formal immediate consumption items valued at less than $100, free of duty.

9999 200 - Formal immediate consumption items valued at less than $100, dutiable.

Country information is shown under these numbers in this report for countries having significant trade in these new "catch-all" classifications. (The estimated total of the under $100 shipments is included in the total for each country in reports in country arrangement such as Report FT 120, *United States Imports of Merchandise for Consumption, Country of Origin by Subgroup.)* All of the estimated figures shown under Schedule A Numbers 9999 100 and 9999 200 are subject to a sampling error of no more than about 10 percent two-thirds of the time in the long run. This sampling error is actually less than 10 percent for most figures shown.

Any user interested in knowing the estimated amount of trade shown in 9999 100 and 9999 200 for a particular Schedule A commodity or commodities may request this information from the Bureau of the Census. It is expected that such requests will be for information on commodities which are, to the knowledge of the person requesting the information, imported to a significant degree in shipments of less than $100. The tables shown in the September 1953 *Foreign Trade Statistics Notes* on the extent of under $100 trade in individual commodities in April 1953 provide some guidance in this regard but as indicated in the *Notes* there may of course be a few additional commodities imported substantially in shipments of less than $100 in July or later months.

---

[1] The sample is selected from only the immediate consumption items, which constitute the bulk of the formal entry items valued at less than $100. Warehouse entry and warehouse withdrawal items valued at less than $100 are fully compiled, since sampling these items would result in very little savings and might result in significantly less accurate figures on changes in the amounts of particular commodities in warehouse.

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as merchandise valued at $100 or less which is entered informally.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 981. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 972. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the formal import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 3 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with description of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number[1] separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.
